

# Introducing VS 700 B

\*All-in-one photobook binding system

Layflat.com  
THE BINDING COMPANY

## Versatile binding machine

### Binding Machines for Duplex Prints

#### Description

VS 700 B is a one-of-its-kind user-friendly versatile machine which carries out all the basic processes involved in photobook binding i.e. window cutting, creasing, hole-punching, and stapling. All these processes can be easily programmed, ensuring that the user just has to feed in the prints manually with the rest being automatic. With its in-built touchscreen control panel, the user can pre-define each project and save it for later use. The machine also has the unique feature of providing V-shape hole-punching and step-binding for a complete LayFlat opening. Moreover, since the VS 700 B can perform multiple operations on a single sheet in a single run, it can be used for creating fold covers, panel card fold covers, and table standees, which can be used as calendars, menu cards etc.

**Paper Width**  
381 mm – 510 mm  
(15 inches – 20 inches)

**Paper Length**  
330 mm x 482 mm (13 inches – 19 inches)

**Paper Thickness**  
0.15 mm – 0.30 mm

**Synthetic Paper Thickness**  
0.125 mm – 0.175 mm

**Speed**  
700 sheets per hour

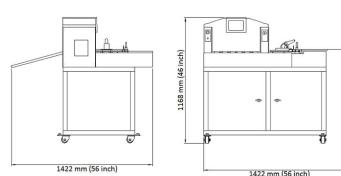

**Air Compressor**  
Pneumatic connection required

**Power Supply**  
220V 50 Hz

**Max. Power Consumption**  
250W

**Machine Dimension**  
1422 mm (L) x 1168 mm (W)  
X 1422 mm (H)

**Weight (approx.)**  
225 kg

#### Details

The VS 700 B has a digital microcontroller with a large LCD touchscreen, having the ability to pre-define and save projects for future use. It can hold up to 99 programs in memory, including precise details for window-cutting, creasing, and hole-punching measurements. This machine also offers the patented V-shape LayFlat binding technology. Two binding options are offered i.e. window-cutting and creasing, with hole-punching and stapling. It can create up to 6 windows or creases per sheet in a single run and can perform multiple operations in a single run for creating fold covers and table standees. The VS 700 B combines the processes of window-cutting, hole-punching, and stapling with utmost precision done in a single window.

### Key Features

Digital Microcontroller with a large LCD touch screen to pre defines & save each project;

Innovative patented technology of "V" shape LayFlat binding;

Two binding options are available window cutting & creasing, with hole punching & stapling;

99 programs can be stored with precise memory of window cutting, creasing & hole punching measurement;

Performs multiple operations in a single run to create fold covers and table standees, creates up to 6 windows or crease per sheet in a single run;

Combine the process of window cutting, hole punching and stapling process with utmost precision, done in a single window;
