# DiLand / WEB software

Online software platform to create and send print orders from home, via computer, tablet or smartphone.

Similar user interface to DiLand Kiosk software.

Products (prints, calendars, photobooks, posters, collages, cards, canvases) and their prices are directly setup by the retailer and can be same as kiosks prices or customized for the web service.

Orders are received by the DiLand Studio software in the shop.

The customer can only send orders to the retailer who gave him the website link and does not have to install anything.

Compatible with all the common internet browsers: Chrome, Safari, Edge, Firefox and Explorer 11.

The server service, used to transfer via internet images between different devices, requires an annual subscription.
