PhotoXport

AirCastPro™ 3

Mobile and Desktop Wireless Print Server

Print Your Way With AirCastPro3

A simple and reliable way to send photos from your iPad or computer to a professional photo printer.

Print Your Way With AirCastPro3

A simple and reliable way to send photos from your iPad or computer to a professional photo printer.

You choose your printer.

We support all the major professional photo printer brands. Choose a supported model that fits your print sizes, event volume and budget.

You choose your app.

Use your favourite photo booth or printing app with compatible AirPrint or IPP printing. Keep the workflow you and your team know.

You choose how to connect.

Go wireless or hardwire through Ethernet. Choose the connection that works best for your booth and venue.

More Possibilities for Your Prints

Explore more ways to print, personalise and manage photos with AirCastPro 3.

Panoramic Printing

Offer larger panoramic products with compatible printers and media.

Overcoat Watermarking

Add subtle branding to the print's finish on supported printers.

Guest Photo Uploads

Let guests submit phone photos through a web page for printing.

Live Slideshows

Display event images through HDMI or a supported web browser.

Printer Pooling

Share jobs across compatible printers for higher-volume events.

Flexible Printing Options

Use hot folders, FTP or supported USB storage for additional printing workflows.

Finishing and Retrieval

Apply automatic borders, use available ICC profiles and retrieve stored photos for reprints or downloads.

Remote Visibility with AirCastPro Uptime

AirCastPro Uptime is included free for AirCastPro 3 users. Check system health, printer status and remaining media, and access supported settings remotely. It is especially useful for unattended booths, permanent installations and operators managing several locations.

- **System health**
  Check the status of your AirCastPro and connected printers.
- **Printer status**
  View printer status and remaining media at a glance.
- **Remote settings**
  Access supported settings remotely when needed.
- **Multiple locations**
  Ideal for unattended booths, permanent installations and operators managing several sites.

AirCastPro Uptime™
Fleet Management / Support

Remote monitoring requires an internet connection, registration and AirCastPro Build 464 or later.
