reintroduced for today's
film industry.

SB-3

AUTOMATIC FILM EXTRACTOR

A trusted design, reintroduced for today's film industry.

The SB-3 is an automatic film extractor based on the well-known Noritsu SB3 design.

It provides photo labs and film-processing businesses with a reliable and efficient solution for extracting 35mm film from cartridges.

SB-3

AUTOMATIC FILM EXTRACTOR

SIMPLE, STEP-BY-STEP OPERATION

The SB-3 Automatic Film Extractor offers a straightforward process for extracting film from cartridges.

POWER ON

Switch on the SB-3 using the power switch.

INSERT THE FILM CARTRIDGE

Place the film cartridge into the designated holder.

ADJUST THE KNOB

Turn the adjustment knob inwards two full rotations.

OPERATE THE HANDLE

Move the handle to the first position. When the red indicator light illuminates, move the handle to the second position.

CHECK THE FILM

Check the extraction point to confirm that the film has been successfully extracted.
